

BLACKBURN YARN DYERS

Quality dyeing since 1915

**COMMISSION LEASING
DRYING • SIZING • CONES • WINDING
DYEING • DELIVERY**

Our main areas of expertise are:

Commission dyeing of yarn on both cones and beams using micro-processor controlled, high temperature dyeing equipment for the dyeing of: cotton, cotton blends, nylon, polyester, viscose, linen, cashmere, wool and wool blends.

Package dyeing of weft yarns for the weaving industry as well as hosiery and knitwear.

Beam dyeing and tape/sizing of warps for the weaving industry.

Shade matching and recipe formulation, carried out using the latest computer colour matching equipment.

New shade development in our own laboratory and sample Dyehouse where all necessary in-house tests can be carried out, eg. Wash/light fastness, etc.

Our company was one of the pioneers in the use of vat dyes and also process direct fast to light, reactive and sulphur dyes on cotton, disperse dyes on polyester and acid dyes on nylon and wool.

A Leasing service is available where dyed beams can be speedily prepared for immediate installation into looms for weaving.

The UK textile industry of today demands dyed yarn - on time - and of the highest possible quality. Nobody is better equipped to deliver this package than Blackburn Yarn Dyers Ltd.

We are the only remaining UK dyer on beam for tape/sizing directly onto weavers beams, the most economic and quality assured method of producing coloured warp beams.

With advances in technology we are able to offer speedy beam leasing facilities in order to aid the introduction of the beam to the loom.

Cones

Package dyeing of weft yarns for the weaving industry as well as hosiery and knitwear.

- Winding & Rewinding and waxing using Precision SSM winding machines
- Computerised colour controlled Dyeing Dye lot sizes from 1 to 500 kilo
- Batch and Streamed Radio Frequency Drying
